

Earth's Chakras: #8 SOUL STAR

Location: 80 miles above the earth

Image by [Free-Photos](#) from [Pixabay](#)

Description:

I didn't find any references to the earth's 8th chakra, so it makes sense to me to place it just outside the earth's atmosphere - about 8 miles above the surface.

The 8th chakra, known as the Soul Star, is located slightly above the Crown Chakra, about 2 feet. With the 8th chakra we enter the realms transcending space and time. This energy center is said to open access to parallel universes and lives; it gives access to the realm of the Akashic records and the sphere of potentialities in the making. It's a useful center for shamanic healing and communication with spirit guides.

Our intention:

1. To connect in with crystalline grid of energy that encircles the earth.
2. To send love and gratitude to Mother Earth and the stars beyond for our beloved place in the universe.
3. To transcend space and time; to play in the field of infinite possibilities.

Music:

[The Great Bell Chant \(The End of Suffering\)](#)

NOTE: the images with this are beautiful
